

CRYPT-ARITHMETIC PROBLEM

Aim

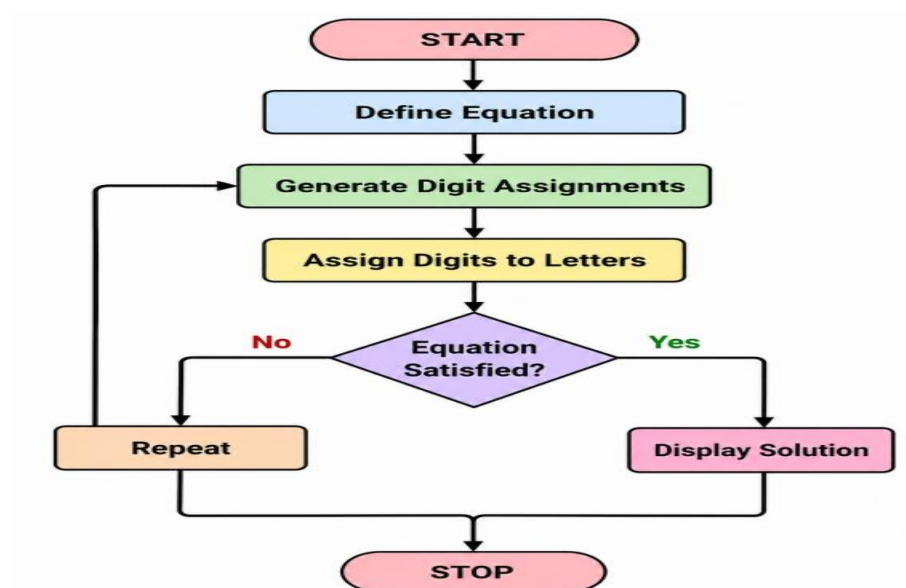

To solve the Crypt-Arithmetic problem using Artificial Intelligence techniques by assigning unique digits to letters.

Objectives

- To understand constraint satisfaction problems.
- To assign digits to letters without repetition.
- To verify the arithmetic equation.
- To find a valid solution.

Algorithm

1. Start.
2. Define the equation $\text{SEND} + \text{MORE} = \text{MONEY}$.
3. Generate all possible digit combinations.
4. Assign digits to letters.
5. Check if all letters have unique values.
6. Verify the equation.
7. If the equation is satisfied, display the solution.
8. Stop

PROGRAM
